

## APPLICATION FOR STANDARD INTERCONNECTION AGREEMENT

This is an application to interconnect a qualifying net-metered facility or small power producer, as described in the Oklahoma Administrative Code ("OAC") 165:40 with distribution facilities owned by Northeast Oklahoma Electric Cooperative, Inc. ("Cooperative"). Within this application, the applicant shall be referred to as "Producer."

Producer shall complete this application in its entirety and deliver it, accompanied by a non-refundable \$100 application fee, to Cooperative.

If Producer and Cooperative enter a Standard Interconnection/Purchase Agreement for Optional Net Metering and Small Power Producing Facilities ("Agreement"), this Application, including all attachments, shall become attached as part of that Agreement. Completing and submitting this Application does not create an obligation on Producer or Cooperative to enter an Agreement.

The type of interconnection required of the Producer will depend on and must be compatible with the location, size, and type of load to be served, as well as the generating equipment and capacity. Interconnected facilities must have a maximum rated capacity of 300 kW or less. Producer must obtain from the Cooperative the phase and voltage of the interconnection that will be furnished before proceeding with the purchase of generators or other equipment. Also, the point of purchase on the premises must be determined before the Producer's wiring installation is made.
